-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 17-57, 60, 61, 63, 71-79, 87-91, 96-98, 100-103, 111, and 112 are drawn to configuring a network appliance, classified in class 340, subclass 286.01.
- II. Claims 58, 59, 62, 69, 70, 85, 86, 94, 95, 99, 109, and 110 drawn to uploading profile information to a network server, classified in class 709, subclass 220.
- III. Claims 64-68, 80-84, 92, 93, and 104-108 drawn to updating firmware, classified in class 717, subclass 174.
- IV. Claims 113-140, drawn to configuring an Internet compatible telephone, classified in class 370, subclass 352.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the configuration of the network appliance and the uploading of profile

information to a server and the updating of firmware and the configuring of an Internet telephone are separate functions and can stand alone. The subcombination has separate utility such as updating firmware and uploading a profile to a server are separate and distinct functions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III, or IV restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
